Step 1

Turn the base upside down so that the holes are facing up. Screw the castor (wheel) in the threaded holes. Use large nut to tighten the bolt. Set base aside.

Step 2

Assemble two of the grid panels using the 2 part grid clips, bolt and small nut (Fig.1). Connect the end of one grid panel to the vertical wire of a second grid panel with bolt. Tighten the bolt with the small nut (Fig.2). Grid clips should be located in the second section from the bottom, the middle and the second section of the top of each grid. Once 2 of the panels are connected, connect the third panel.

HORIZONTAL WIRE ON GRID SHOULD BE ON FRONT SIDE
